

Cancellation of EV Tec 2021: Always Stands with the Industry

Following close consultation with our long-term partner PGUB, D+S Automotive and industry representatives, NürnbergMesse China has decided to cancel both the physical conference in Shanghai, China and gathering in Nürnberg, Germany of EV Tec 2021. This decision was taken on account of the domestic travel restrictions in the wake of the outbreak of the Covid-19 pandemic last month. It still remains some medium and high risk regions until now. As a responsible organizer, NürnbergMesse China will always stand with the industry and make the safest decision for the participants.

However, face-to-face communication with experts and peers is an irreplaceable part of physical exhibitions and conferences. Therefore, let's look forward to Car Symposium China (April 2022) and EV Tec 2022 (October 2022) to provide the professional international communication platforms for the electric vehicle industry.

If you have any questions, please feel free to contact EV Tec team.
